OBJECTIVE

I want to use my strong background in Pharmacology (Ph.D. (Ongoing), M.Phil., and DVM) along with my research and teaching experience to contribute to science and education. My main interest is in pharmacology, natural products, nanomedicine, and new treatments for diseases like rheumatoid arthritis. I have good skills in research, data analysis, and scientific writing, and I enjoy working with others on projects. I also have experience as a reviewer for many journals. My goal is to apply my knowledge to create useful research, improve healthcare solutions, and support learning in both academic and professional environments.

Skills

I possess a diverse set of academic, research, and professional skills gained through higher education, training, and extensive teaching and research experience. My expertise includes scientific writing, research article preparation, review article development, and extension article

drafting for reputable journals. I have practical knowledge of the publication process, including article submission, peer review, and editorial communication. As a reviewer for multiple international journals, I am skilled in evaluating research quality, methodology, and scientific impact. In the laboratory, I am trained in managing and maintaining laboratory facilities and equipment, ensuring compliance with safety and quality standards. I have hands-on experience in animal handling, pharmacological testing, and biochemical assays. My skills extend to apiculture (beekeeping), sericulture (silkworm cultivation), and aquaculture, reflecting strong expertise in applied agricultural and veterinary sciences. Additionally, I am experienced in wildlife care and management within zoological facilities. I am proficient in using research software such as Mendeley, R-Studio, GraphPad Prism, and Turnitin, enabling me to manage references, perform data analysis, visualize research findings, and ensure originality in academic work. My technical skills also include Microsoft Office Suite, Advanced Excel, Office Automation, and Graphic Design. Beyond technical expertise, I have strong leadership, communication, and management skills, allowing me to coordinate teams, guide students, and organize academic tasks efficiently. I have experience in counseling individuals of different gender identities, reflecting inclusivity and empathy in professional interactions. Moreover, I have developed practical skills in photography, videography, freelancing, and project management, along with specialized knowledge in medicinal plants, nanomedicine, and pharmacological innovations. My training in HPLC, proximate analysis, and clinical biochemistry further strengthens my experimental and analytical capabilities. Overall, my skill set combines scientific research, teaching, software proficiency, and practical agricultural knowledge, enabling me to contribute effectively to academia, industry, and multidisciplinary research projects.

WORK EXPERIENCE

I have over five years of teaching experience in the school sector, where I developed strong instructional and classroom management skills. Additionally, I possess five years of teaching experience at the college level, focusing on advanced subjects and guiding students in their academic growth. At the university level, I gained one year of instructional experience as a teaching assistant, supporting undergraduate and postgraduate students in Pharmacology and

related courses. My teaching roles have helped me build expertise in curriculum delivery, mentoring, and academic support, while also enhancing my communication, leadership, and collaborative skills in educational settings.

RESEARCH AREA

Pharmacology, Nanomedicine, Nanomaterials, Rheumatoid Arthritis, Phytochemicals, Natural Products, Medicinal Plants, Drug Delivery Systems, Targeted Therapy, Animal Handling, Veterinary Medicine, Clinical Biochemistry, Zoonotic Diseases, Aquaculture and Fish Health, Nutraceuticals, Toxicology, Immunomodulation, Inflammatory Disorders, Biotechnology Applications, Public Health and Epidemiology
