Status:

Mit der Kategorie "Status" antwortet anabin auf eine der am häufigsten gestellten Fragen soweit möglich bereits auf der Ebene des Institutionstyps: Ist eine ausländische Bildungseinrichtung als Hochschule "anerkannt" oder nicht? Die drei verwendeten Kategorien sind wie folgt definiert:

- Klasse
- **Definition**
- **H+**
- Die Institutionen dieses Typs sind im jeweiligen Herkunftsland in maßgeblicher Weise als Hochschulen anerkannt (akkreditiert, attestiert u.a.) und ausgehend davon in Deutschland als Hochschulen anzusehen. Besonders für Länder der ehemaligen sozialistischen Welt sind auch Forschungsinstitute erfasst, da an ihnen Promotionen und Habilitationen möglich sind. Da diese Qualifikationen denen an Hochschulen gleichwertig sind, werden die Forschungsinstitute ebenfalls dieser Kategorie zugeordnet. Achtung! Die Einstufung als H+ bedeutet lediglich, dass Abschlüsse, die an dieser Einrichtung erreicht wurden einer Gleichwertigkeitsuntersuchung im Hochschulbereich unterzogen werden können. Eine Vorentscheidung darüber, ob die Abschlüsse dieser Einrichtung deutschen Hochschulabschlüssen gleichgestellt werden können, ist damit nicht verbunden.

3. PROFESSIONAL EXPERIENCE

towards the [experienced **pull-back** (re-iteration and implementation) cons-vs. any ‘negative’ global and individual **Rational Subject’s** ‘happened/attained’ **risks and incertitude** – by/through/from a step-by-step **revision** vs. any **societal feed-back** (completed/consistent) — reformulation vs. a **pros-societal feed-before** (N – 1 / N attained characteristics / so, from a desired nexus of N characteristics]

of the following personal long-term elicited elements of the {original concepts/constructs/scientific activities-contexts – 1993-2024}:

‘Societal Interactive Change’, ‘Information/ Knowledge Ratio’, ‘Interactive Modelling/Simulation/Emulation’, ‘Human-Machine Interface’, ‘Societal Neural Networks’, ‘Natural-Artificial Dualism’, ‘(Non)systemic, Subtle and (A)symmetric entities’, ‘Network of Networks’, ‘Science/Technology // Culture/Arts // Religion/Philosophy ///Society - Learn to Live and to Progress Together’, ‘Cybernetics of New Products’, ‘Cybernetics of Operative Actions/Operative Decision’, ‘Generosity-Creativity-Solidarity Triad’, ‘Spirituality-Biodiversity’, ‘Real World/e-World’, ‘Logic of Life --- Life of Logic’, ‘Creative Partnership of Welfare’, ‘Natural and Artificial Intelligence and Life’, ‘Cognitive Processes – Qualia/Paradoxes/Limitations’, ‘Geo-Eco-Bioeconomy’, ‘Subtle Corpus’, ‘Smart Energy – Smart Food Problems’, Personal approaches into the ‘History and Philosophy of Science and Technique’, Personal approaches within instituting two new professions ‘Peace Entrepreneurship/Progress Entrepreneurship’, ‘Societal Interactive Change’ & ‘Societal Indifference/Engagement/...’, Activities into the ISA Societal Indicators – RC55-ISA, Rational Choice – RC55-ISA, Activities into the Technology-Culture-International Stability – TC9.5-IFAC, Activities into the International Society of Human Ethology (ISHE), ...

So, let present this open set of these original concepts/constructs/activities within these “**four (modes of thinking) – as cognitive & meta- cognitive frames** (i.e. **analytic; holistic; experimental; experiential**)” - according to an original idea –1992 published by the academician **Solomon Marcus** (1925-2016 / www.acad.ro) :

Note 2:

Here would be a possible proper place to confess on my high-positive surprise on finding (on your institutional site) the enumeration of your team members' research interests. My surprise was re-tracking me to the re-representation of some of your team research interests by this framed background. Thus, I was able to do more for the 'same' framed background as with the above data about my enumerated original concepts/constructs/activities.

Sure that these procedural steps of re-representation may be extended towards a higher level of explanation/understanding on these central core of deep cognitive processes, ...

Note 3:

There is my modest contribution – 're-searching'/'adding' a denomination of a cognitive congruent meta-approach to each of the above re-presented four modes of thinking; i.e.

Analytic mode of thinking _ _ Geomodernity

Holistic mode of thinking _ _ Transdisciplinarity

Experimental mode of thinking _ _ Fuzziness

Experiential mode of thinking _ _ Structural-Phenomenology

‘Anthropocene Cradle of Wisdom’ - towards eliciting the ‘Contemporary Types of Societal Analysts’ -- In Search for the 4th Dimension --: The Relations “NEANDERTHALS <--> CRO MAGNIONS” - Kindle Edition

by [Nicolae Bulz](#) (Author) Format: Kindle Edition, 105 pages, July 15, 2025

*1_ SORT [of Explanations Related to an ‘Anthropocene Juridical Wisdom’ Construct ...]:

Dedication IN MEMORIAM – four personalities:

– The 1st personality: **Saint Apostle ANDREW** [the forever learner from ‘masters’; no-scripts; but resulting-*full-of-courage’s acts* – consequently followed by *two peoples: Romanian and Scottish*].

– The 2nd personality: [Honorary] Academician [Ethnologist] **Romulus VULCĂNESCU** [the forever learner from the **traditional-popular images and folklore words**: resulting new-synthetic-constructs: ‘*Sky’s Column*’; ‘*Horal Phenomenon*’; ‘*Church from the-Fir-Trees*’; “*JURIDICAL*”

ETHNOLOGY”.

– The 3rd personality: **Socio-Cybernetician Professor Felix GEYER** [see 2.1_below].

– the 4th personality: **Academician [Structural-Phenomenologist] Mihai DRĂGĂNESCU** [*the forever learner from the ‘results’ of high-elicited ‘philosophic experiment’*: resulting new-analytic-synthetic-constructs: .

****2_SORT**: About a finite (?) set of “**societal analysts-types**” within our contemporary societies:

-2.1 **Professor Felix GEYER**’s experience, wisdom and knowledge were elicited/exposed a set of *three analysts-types:ROMANTICS, CYNICS, and REALISTS*. He is, also, **SOCIOCYBERNETICS** - INITIATOR. **SOCIOCYBERNETICS** as an explicit interdisciplinary domain has a long-term searched best host place; now it is within ISA structure, as a Research Committee.

-2.2 Case-studies ‘known’ by the Session proposer: *four types of high-level analysts*:

-2.2.1: i.e. A type of personality within a best acknowledged-to-*realities’ REPRESENTATION*, but presenting these [toward a **SOLVING**-problems state] only-and-only *versus the current political interests (not anchored at all into the societal needs and the current socio-drama)*;

-2.2.2: i.e. A type of personality acknowledged-to-the-largest-*realities*, but acting only for the *tracking-mainly-ideas of-political progress ‘per se’* [mostly through/by-chief’s-approval: “*IF..., THEN...*”];

-2.2.3: i.e. A type of personality ‘acknowledged/related’-to-largest-*idealities*, but acting only through *‘personal- imperative-statements(-without-any-societal-recourse)’*;

-2.2.4: i.e. A type of personality ‘acknowledged’-to-largest-*idealities-and-realities*, but acting mostly by/for a *‘societal silence’*... even during a *chaotically societal turbulence*.

*****3_SORT**: About two ‘new’ professions: **‘PEACE ENTREPRENEUR’** and **‘PROGRESS ENTREPRENEUR’** - inquiring and eliciting ‘more’ on the **‘Contemporary Types of Societal Analysts’** - inspired by an **‘Anthropocene Cradle of Wisdom’**”:

These ‘new’ professions are necessary within the **contemporary quasi-turbulent worldwide COMPLEXITY**:

---Two long-termed pseudo-local wars: in Ukraine, and in Middle East – the war in Middle East is ‘observable’ mostly at the borderland of Israel/Gaza strip, and Israel/South Liban – but each of these two wars is worldwide linked.

---A continue ‘worldwide-meta-economic paradox’: the technological advance has an exponential trend, but-meantime the ‘worldwide economic stability’ is dynamically related to a higher-and-higher level of **RISKS** and **UNCERTAINTY**.
